

CHEMICAL STORAGE CABINETS

- Available in a wide range of uses including acid storage and flammable liquids
- Cabinets are lockable via a two point locking system
- All units have fully adjustable shelves to 45mm pitch
- Spillages to drain into the leak-proof sump below
- Removable leak-proof sump
- Sump cover to allow containers to be stored on the sump whilst retaining the full containment capacity
- All cabinets comply with HSG51, COSHH and current Health, Safety and Environmental Regulations

CHEMICAL STORAGE CABINETS

These cabinets are constructed from Zintec coated steel with spot welded seams with gas welded Corner Joints for extra strength. The doors are lockable via a two point locking system and have a reinforced vertical panel to prevent distortion due to heat. Each unit comes with at least one fully adjustable shelf to 45mm pitch, and the sump cover allows containers to be stored on the sump acting as another shelf, whilst retaining the full containment capacity. Spillages drain into the leak-proof sump below which has a removable leak-proof sump. All cabinets comply with HSG51, COSHH and current Health, Safety and Environmental Regulations.

ACID STORAGE CABINETS OPTION

- Finished in White Full Epoxy Powder Coat for Acid/Corrosive resistance

FLAMMABLE STORAGE CABINET OPTION

- Shelves are perforated to allow spillages to drain into the leak-proof sump below
- Finished in Grey Stove Enamel

ADDITIONAL OPTIONS

- Single Door on CAB101, CAB103, CAB 201 and CAB203
