# PRODUCT SPECIFICATION

## GENERAL DESCRIPTION

The Hot Cube is a high performance laboratory oven, which is ideal where space is a premium. The controlled and steady heater and ventilation make this incubator ideal for slide drying.

It has a robust steel exterior with an AISI 304 stainless steel ventilated chamber with a crystal windowed door for easy viewing.

The unit is fitted with a digital temperature reader and a temperature controller programmable to desired temperature with precision of  $\pm 0.5^{\circ}\text{C}$  and maximum temperature of  $80^{\circ}\text{C}$ . An alarmed timer means you can set your required drying time. It is also fitted with an independent safety device which can be calibrated.

Inside the chamber is fitted with two racks but three additional racks are an optional extra.

## TECHNICAL:

Voltage: 230V

Power: 360W

Internal volume: 5.4 litres

## DIMENSIONS AND WEIGHT:

Internal dimension: 190x150x190 (L x D x H)

External dimension: 380x240x300 (L x D x H)

Weight: 10kg

## AVAILABILITY AND ORDERING DETAILS:

This item is stocked by the manufacturer.
