

SLIDE DRYING HOTPLATE

The HSL285 Slide Drying Hotplate is a generously sized design accommodating 47 slides in total. The heating plate can be used as a stretch bench for mounting, stretching and drying paraffin sections on slides, fixing smears and even heating fluid samples in Petri dishes. The black anodised surface provides a suitable contrast for visual inspection. The temperature adjustment and power On/Off switch with control light for 'On' mode are conveniently located at the front of the unit.

Code: HSL285

Dimensions: 324 x 272 x 82mm

Temperature: Ambient +75°

Weight: 2.75kg
