

# RETRACTABLE DISPOSABLE SCALPEL

## AN EXTENDED RETRACTABLE SCALPEL RANGE WITH SHARPS SAFETY COMPLIANCE IN MIND.

The EU Council Directive 2010/32/EU recommends that medical devices incorporating engineered safety mechanisms and protection should be “considered” by staff as “part” of their risk assessment process. This would include devices such as the Swann-Morton Retractable Scalpel now extended to include a Safety Stitch Cutter.

**1.** Temporary lock in the forward position has been strengthened so that the blade will stay extended even if it encounters a hard surface or bone during use.

**2.** The slider mechanism now contains a notch in the retracted position that holds the blade more securely in the passing/retracted position.

**3.** A permanent lock position has been added to the retracted position. This requires a conscious amount of force to engage the slider into the permanent lock position.

## RETRACTABLE DISPOSABLE SCALPEL

Designed for single patient use only, disposable, sterile or non-sterile and Latex safe.
