

# EMBEDDING TISSUE TAMPERS

Essential tools in histology for ensuring that tissue specimens are properly oriented, evenly distributed, and tightly compacted within embedding media.

# EMBEDDING TISSUE TAMPERS

## ALUMINIUM TISSUE TAMPER WITH THERMAL INSULATED HANDLE

Tissue tampers play a crucial role in the early stages of histological processing, helping to ensure the tissue is properly oriented and compacted within the embedding medium.

We have designed and developed a range of embedding tissue tampers each manufactured from high quality aluminum and fitted with a 40mm tall, 18 - 16mm tapered handle that has been manufactured using thermal insulated material to protect users.

## TISSUE TAMPER SIZE OPTIONS

### STANDARD

CODE	DIMMENSIONS	TYPE
CAS840012	12mmCircle	Standard
CAS841212	12 x 12mm	Standard
CAS841616	16 x 16mm	Standard
CAS841814	18 x 14mm	Standard
CAS841828	18 x 28mm	Standard
CAS842020	20 x 20mm	Standard
CAS842825	28 x 25mm	Standard

### SUPER

CODE	DIMMENSIONS	TYPE
CAS844030	40 x 30mm	Super
CAS845035	50 x 35mm	Super
CAS845540	55 x 40mm	Super

### SETS

CODE	DIMMENSIONS	TYPE
CAS840000-7	Set of 7 Sizes	7 x Standard
CAS840000-8	Set of 8 Sizes	7 x Standard 1 x Super

*Bespoke size tissue tampers are available on request.*
