

# BLOCK & SLIDE STORAGE SOLUTION

Block and slide storage units that allows laboratories to organise and archive specimen samples safely and efficiently. The diverse structure and functionality of these unique block and slide storage solutions have been designed to adapt to any given laboratory. Available in detachable, stackable modules as well as alternative ready-built freestanding or movable units, catering to all laboratory sizes.

## MEDBLOCK

Modular and large capacity storage system for blocks.

## MEDGLASS

Modular and large capacity storage system for microscope slides.

## MEDMACRO

Modular storage system for mega blocks and large slide.

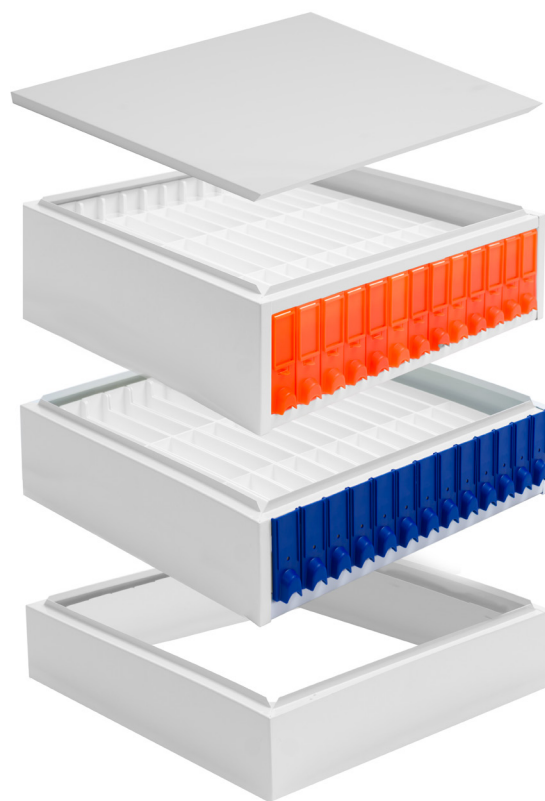

# MEDBLOCK

## STACKABLE BLOCK STORAGE SOLUTION

Our MedBlock single tray and double tray block storage modules are available in either a metal or ABS frame and can be stacked up to 18 modules high. Their secure, easy to stack functionality makes them adjustable to fit within enclosed spaces or on top of work surfaces for quick and easy access to samples. Adapting to the demands of modern laboratories, alternative drawers are available that have evolved to feature internal dividers that aid cassette reading and archiving with digital readers.

Each module is available with removable, coloured drawer fronts that improve organisation, categorisation and management of your specimen samples as well as brings colour to your laboratory.

BUILD THE STORAGE YOU NEED AND ADD MORE MODULES OVER TIME

## MEDBLOCK MODULES

## MEDBLOCK ABS

PLASTIC BODY - PLASTIC TRAYS

Single tray storage system for blocks with an ABS plastic frame and 13 pull-out drawers. The modules are stackable up to 18 modules high and supplied with removable, coloured fronts for the drawers.

Dimensions (WxLxH): 48x48x9 cm

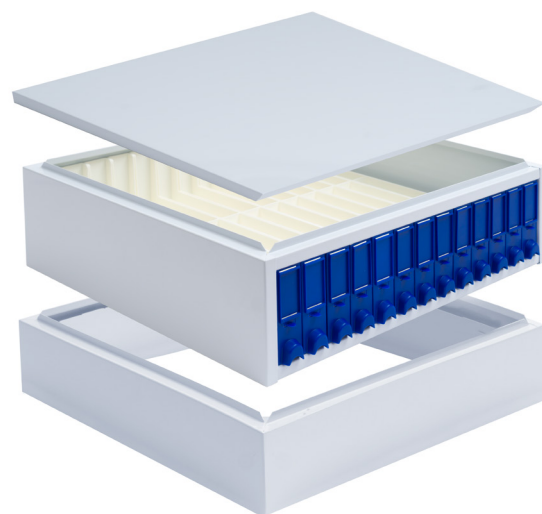

Product Ref: MSS0353

# MEDGLASS

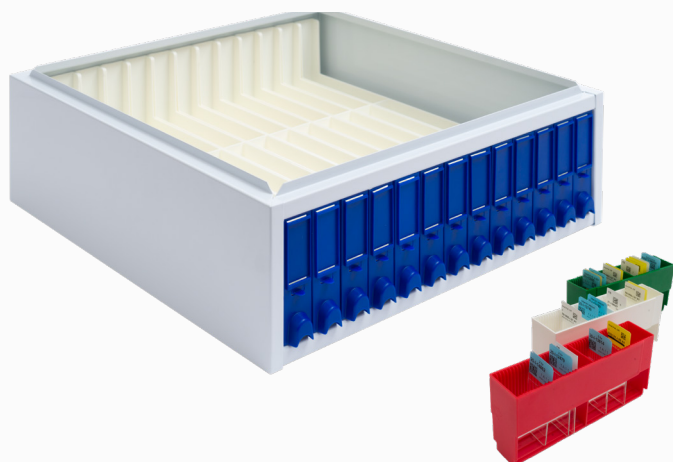

## STACKABLE MICROSCOPE SLIDE STORAGE SOLUTION

Our MedGlass storage modulars are made up of a metal frame with ABS plastic drawers and can be stacked up to 11 modules high. Their secure, easy to stack functionality makes them adjustable to fit within enclosed spaces or on top of work surfaces for quick and easy access to samples. Adapting to the demands of modern laboratories, sub-trays are available that have been designed to easily sit within a draw and feature internal dividers that enable slide reading and archiving with digital scanners. The drawers are easy to pull, ensuring a safe retrieval of samples. Each drawer offers removable, coloured fronts that improve organisation, categorisation and management of your specimen samples as well as brings colour to your laboratory.

# MEDBLOCK/MEDGLASS ACCESSORIES

## MEDBLOCK DRAWERS

ABS plastic drawers compatible with the MedBlock and MedBlock ABS storage units for storing blocks. The drawers are available with a choice of 7 different coloured fronts that are easily interchangeable, allowing labs to categorise samples and workload, tailored to their unique requirements.

## MEDBLOCK DOUBLE DRAWERS

ABS plastic drawers compatible with the MedBlock-Double storage range only. One drawer offers two layered trays for double the quantity of cassette storage. Each drawer is available with a choice of 7 different coloured fronts that are easily interchangeable, and the double tray inside the drawer can be removed.

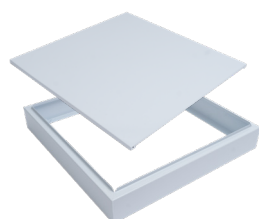

## MEDGLASS DRAWERS

ABS plastic drawers compatible with the MedGlass storage units for holding microscope slides. The drawers are available with a choice of 7 different coloured fronts that are easily interchangeable, allowing labs to categorise samples and workload, tailored to their unique requirements. The MedGlass drawers have compatible sub-trays that comfortably sit within the drawer to help improve loading speed and retrieval. Each sub-tray holds a total of 50 slides.

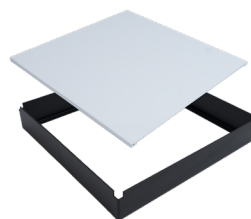

## MEDBLOCK, MEDBLOCK - DOUBLE AND MEDGLASS TOP AND BASE

Metal top and base compatible with the MedBlock, MedBlock-Double and MedGlass modular storage systems.

## MEDBLOCK ABS TOP AND BASE

An ABS plastic top and modular storage system. Only for the MedBlock ABS modules.
